

ASPEN+

Fuel for professionals

Aspen+ is a high octane alkylate petrol that is better for the human health and the environment. Aspen+ has been developed specifically for competition cars and boats, go-karts, motorcycles, snowmobiles and other particularly demanding applications where maximum performance is required.

Technical advantages

- Always maintains high, even quality.
- Reduces the risk of engine knocking.
- Reduces engine wear, giving an increased longevity
- Gives a cleaner engine with less deposits.
- Does not deteriorate during long-term storage.
- Reduces the risk of vapour lock.

Environmental and health advantages

- Less hazardous petrol vapours and exhausts.
- Virtually free from benzene, toluene, sulphur and olefins.
- Better for the environment.

Aspen+ is sold in 25 l cans and in 200 l drums.

Typical data

	Aspen+	Declarations; health and environmental impact
Octane rating RON	98	Knocking resistance at low engine speeds.
Octane rating MON	94	Knocking resistance at high engine speeds.
Vapour pressure (kPa)	55 - 65	High vapour pressure leads to more petrol vapour and operating problems in hot conditions.
Sulphur (ppm)	1	Hazardous to health and the environment.
Aromatic content (vol %)	0,1	Very harmful to health and the environment, can cause nerve damage, headaches, fatigue, nausea.
Benzene content (vol %)	0,01	Benzene can cause blood cancer (leukaemia).
Olefin content (vol %)	0,1	Cracked heavy fuel oil is harmful to health and the environment. Leads to operating problems, reduces storage stability.
Density (kg/ m³)	700	

2130-18 V2-2011
