If you're involved in the aviation industry you understand that the cleanliness and quality of aviation fuel is vital to the safety of the aircraft, passengers and crew.

From major airport hubs to isolated communities, the quality of aviation fuel must be maintained. Ensuring you have purpose-built storage tanks designed for aviation fuel helps maintain fuel quality.

UNITY FUEL SOLUTIONS ARE THE SPECIALIST MANUFACTURERS OF ABOVE GROUND DOUBLE-WALLED AVIATION TANKS.

Our tanks offer flexible storage and pumping solutions for either Aviation Gasoline (AVGAS) or Turbine Fuel / Jet Fuel (Jet A1).

OUR RANGE OF AVIATION TANKS HAVE BEEN DESIGNED FOR LARGE AND SMALL AVIATION OPERATORS REQUIRING FLEXIBILITY IN CHALLENGING LOCATIONS.

The UNITY FUEL BLOC Av and GRANDE Av range is ideal for:

- Small Commercial Airfields
- Private Airfields
- Isolated Rural Airfields
- Onshore - Offshore Refuelling
- Helicopter (helipad) Facilities

STANDARD FEATURES

- All tanks meet UL-142, ULC-S601-14 compliance as standard. Bloc Av 1000 - 6000 additional UN-31-A/Y compliance.
- Double-walled structural design.
- 6mm thick mild steel outer tank wall.
- 6mm thick GR 304 stainless steel inner wall.
- GR 304 stainless steel fuel lines, piping and fittings.
- Floating suction (Grande Av only).
- Overfill protection system (Grande Av only).
- High level alarm (Ex-i - Intrinsic safe / Grande Av only).
- Emergency venting.
- Vent Pipe: Free Vent.
- Pressure Vacuum (optional).
- Fluid Level Dipstick.
- Sloping 50:1 floor to collection sump with sampling facilities.
- Sampling cabinet (supplied loose, Grande tanks only).

OPTIONS

- GR 316 stainless steel upgrade.

*Conditions apply. Some features standard, some optional extras, depending on product range. Custom colours, coatings, dimensions and refuelling equipment packages are available upon request.
